Ohio Gravure Technologies Inc

Engineering Excellence in Dayton since 1980

About Ohio Gravure Technologies

Ohio Gravure Technologies Inc, is the developer of the Vision engraving heads, Collage Layout System, Vista II Cell Sensing System, the QuickCell System, Hybrid Engraving and the exciting new Spectrum Engraver. With the AccuPress MicroGravure Printing system and the MicroStar MicroEngraving system, Ohio GT has targeted markets for advanced micro-machining and micro-printing, including printed electronics, specialty coatings, films, optical, and more.

Ohio Gravure Technologies is leading the way for non-traditional uses of gravure with special application engineered cylinders holding accuracies as tight as 5µm. For the packaging gravure market, we continue to develop new technology to produce the fastest, most accurate, and cost-effective engraving hardware.
