Chapter 1

Introduction

About the Spectrum Engraver

The Spectrum engraver from OHIO Gravure Technologies is designed to reduce the amount of equipment down-time. Even the best designs do have occasional issues that may require replacement of parts. Use this manual to locate and identify parts when a failure occurs and a replacement is required. Use this information to contact the Service department at OHIO for acquiring the replacement piece.

Purpose Of Manual

This manual was written for Service personnel to accomplish the following requirements:

- ❖ Aid in the visual identification of parts on the Spectrum engraver.
- ❖ Provide an easy to use method of finding a part number.
- ❖ Simplify communications and reduce errors when it is necessary to order a replacement part.

About this manual

This manual is divided into three sections: Introduction/Safety, Parts List, and Parts Photographs. The Parts List provides a table with information on the parts number, description, general information, and a small picture of the part. The Parts Photographs has large pictures of each part in the Parts List.

The Parts List and Parts Photographs sections work together. Links in the Parts List open up the appropriate large photograph in the Parts Photographs.

NOTE: Please be aware that development on the Spectrum is on-going to ensure that the best possible results are produced by the Spectrum. Please be careful when reviewing a part in this manual that matches the part on your engraver. In most cases, there is but one choice, but in some cases there are multiple choices.

Safety

OHIO GT equipment is built with the latest technology and is totally safe to operate when used in accordance with provided operation manuals. Improper use of the equipment or inexperienced personnel can lead to dangerous situations. Operating procedures affecting the safety of the equipment is forbidden.

The operator is responsible for:

- Ensuring that no unauthorized personnel are working on the machine.
- Reporting any signs of change affecting safety to his supervisor or OHIO GT.
- Operating the machine in good condition only.

Modifications and changes affecting equipment safety are strictly forbidden. Every person operating or maintaining this unit must read and understand the complete operation manual. The correct usage includes following the manufacturer's recommendations for installation, operation and maintenance.

Only authorized and trained personnel are allowed to service and install the machine. These people have been instructed about the possible dangers. The operator may perform preventive maintenance routines, provided the instructions are strictly followed.

All service and maintenance work must be performed while the machine is shut off. Safety covers, doors and flaps that are mounted for safety reasons are only to be removed or opened after the machine is shut off.

Use of Non-Original Parts

OHIO GT strongly recommends the use of original parts for repairing or replacing worn parts, and lubrication. OHIO GT cannot accept responsibility for machine damage or problems encountered due to use of non-authorized parts or material. Use of non-original parts during the warranty period will void the warranty.
